MUXAMMADBOBUR KOMILJONOV
FRONTEND DEVELOPER

Tashkent, Uzbekistan • +998 90 841 55 30 • boburkomilovv@gmail.com

SUMMARY

Frontend developer with 4+ years of experience in React and TypeScript. I successfully design architecture, create scalable UI kits, implement modern tools such as Tanstack Query, Module Federation, Zustand, Zod, Redux Toolkit, and set up CI/CD for frontend. I have worked both in teams and as a sole developer. I have built projects from scratch, optimized legacy systems, and migrated large projects to new architectures. I have experience in both product and outsourced development, in teams of 3 to 10 people.
I strive to create user-friendly, stable, and scalable interfaces.

I can communicate clearly, take responsibility for my work, see tasks through to completion, am responsive to constructive criticism, and quickly master new tools.

PROFESSIONAL KNOWLEDGE AND SKILLS

Spoken languages: English (C1, IELTS 7.0), Russian (C2), Uzbek language (C2)
Programming languages: TypeScript, JavaScript
Technologies: React, Next.js, Redux, Redux Toolkit, Zustand, Jotai, TanStack Query, React Hook Form, Zod, Vite, Axios, WebSocket, Git, CI/CD, i18next, React Leaflet, Leaflet Plugins, MapLibre GL, Material UI, shadcn/ui, TailwindCSS, Styled Components, SCSS, CSS, Highcharts, Recharts, ApexCharts, Chart.js, Framer Motion
Software Management: Redmine, Trello
IDE: VS Code

WORK EXPERIENCE

Smart Base • Frontend developer • November 2023 – Present

Responsibilities:
- Architected and evolved a scalable frontend architecture for enterprise-level systems
- Refactored and optimized large-scale legacy codebases, significantly improving maintainability, performance, and stability
- Developed modular, reusable components and internal UI patterns used across multiple applications
- Implemented complex user interfaces, including analytical dashboards, data visualizations, and interactive maps
- Optimized rendering and data flows in applications handling high volumes of data and real-time updates
- Integrated frontend applications with internal APIs and real-time services
- Developed sophisticated forms, filters, and validation logic for data-intensive business scenarios
- Conducted code reviews, mentored junior developers, and contributed to establishing frontend development standards
- Collaborated closely with backend engineers, designers, and product managers on architectural and product decisions

Technologies:
React, TypeScript, Vite, Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod, Leaflet, data visualization libraries, WebSockets, TailwindCSS, SCSS, Git, CI/CD

Masterplast • Frontend developer • April 2023 – October 2023

Responsibilities:
- Designed and implemented an interactive 2D product configurator using Canvas API for real-time visualization
- Developed complex client-side configuration logic, including dimensions, dependencies, and constraints
- Optimized rendering performance to ensure smooth operation of dynamic and visually complex interfaces
- Built a user-friendly interface for configuring and previewing customizable products
- Structured frontend state management to support predictable behavior and responsive updates
- Enhanced UX by simplifying configuration scenarios and reducing user errors

Technologies:
Nuxt.js, Vue, TypeScript, Canvas API, Pinia, SCSS

ODMSoft • Frontend developer • October 2022 – February 2023

Responsibilities:
- Refactored and stabilized legacy frontend code, improving maintainability and reducing critical bugs
- Participated in migrating the frontend from an outdated topology-based architecture to a modern Nuxt + TypeScript stack
- Developed and maintained features related to secure digital document signatures and PDF processing
- Ensured correct integration of the frontend with backend services for document processing and signing
- Maintained production environment stability alongside product evolution

Technologies:
Nuxt.js, Vue, TypeScript, CSS

Internships • Frontend developer

Internship: "Yandex Go"
Developed interfaces for the Yandex Go platform, a leading "super-app" for taxi hailing and transportation services.

Role: Frontend developer
Responsibilities:
- Resolved bugs and stabilized the UI in a high-load product
- Developed an internal tool for testing trips with various parameters (tariffs, routes, statuses, etc.)
- Automated and simplified the trip scenario verification process, significantly accelerating the work of QA engineers and developers
- **Technologies:** React, TypeScript, CSS, Redux, Redux Toolkit
- **Team:** 14 frontend developers

Project Link: https://taxi.yandex.com/

Freelance • Frontend developer • May 2021

Engineered web applications and user interfaces for a diverse range of clients. Worked on projects of varying scale, from high-converting landing pages to complex Single Page Applications (SPAs) with integrated external services.

Responsibilities:
- Developed web applications using React and Vue with modern libraries and tools
- Integrated REST APIs and configured client-server interaction
- Analyzed client requirements and proposed optimal technical solutions
- Developed responsive interfaces with a focus on high-quality UX
- Provided support and further development for existing projects
- **Technologies**: React, Vue, JavaScript, TypeScript, REST API, SCSS, Vite, Webpack

EDUCATION

Bachelor's in Computer Science
Webster University in Tashkent • May 2027
